BIBLIOGRAPHY

Dr. Jutammat Klinsoda is a professional researcher at Institute of Food and Product Development, University of Kasetsart, Thailand. Her expertise is Food Safety and Nutrition, Food and Feed Safety Policy, and Gut Microbiome in Food Safety Aspect. She received her bachelor's degree in Food Science and Technology from University of Thammasart, and her master's degree in Safety in the Food Chain from University of Natural Resources and Life Sciences (BOKU), Vienna, Austria. Since 2020, she obtained a PhD's degree in Doctor of Philosophy (Nutritional Sciences) from University of Veterinary Medicine Vienna, Austria. Dr. Jutammat 's contribution has been significant in the food safety policy development for Thailand when she worked for Ministry of Public, Health Thailand to support FAO Thailand to organize ASEAN meeting. After obtaining PhD qualification, she built up several publication profile internationally. Currently, she develops her experimental and research-based approach to uncovering interaction of food and human gut microbiota as well as a microbiota transfer of zoonotic pathogens from farm to table and her work is increasingly multidisciplinary by cooperating projects with several experts from national and international university and government sector to achieve food safety and quality in the whole food chain. Dr. Jutammat has teaching experience on international food law and food safety management.

RESEARCH EXPERTISE

- Food safety and nutrition
- Food policy
- Diet-microta interaction
- Microbiome
