## BIBLIOGRAPHY

Dr. Orawan La-Ongkham graduated with a B.Sc. in Microbiology, a M.Sc., and a Ph.D. in Biotechnology from Kasetsart University. She has been a researcher in Department of Applied Microbiology at Institute of Food Research and Product Development, Kasetsart University, since 2017. Her previous research has focused on human gut microbiota and the relationship between the gut microbiome of healthy Thai people, age, and diet. She is also interested in the microbial communities inhabiting a variety of foods. Her research interests include the application of probiotics and prebiotics in functional foods and the analysis of probiotic and prebiotic properties using human gut modeling.

## RESEARCH EXPERTISE

- Microbiome research
- Assessment of probiotic and prebiotic characteristics and their application
