BIBLIOGRAPHY

Miss. Sawinee Krittaphol has been working as a researcher at Technology Transfer Center, Institute of Food Research and Product Development, Kasetsart University. She has wide range of experience on food science related research, especially application of edible coating and hydrocolloids in food to add value to food products. She also has experiences to conduct research using analytical chemistry to identify and quantify food flavor components, and determination of health-related bioactivities in food products. As a researcher at Technology Transfer Center, she also has duty as a consultant for entrepreneurs who seek support from IFRPD RD service to aid their business need.

RESEARCH EXPERTISE

- Application of edible coating in food product
- Application of food hydrocolloids
- Determination of food bioactive properties
- Chromatographic analysis of food flavor components
- Development of value-added food products
