

DR. NARAPORN PHOMKAIVON

Professional Researcher

PROFILE

Professional Researcher,
Department of Food
Chemistry and Physics,
Institute of Food Research and
Product Development,
KASETSART UNIVERSITY

BIBLIOGRAPHY

Dr. Naraporn Phomkaivon is a professional researcher at the Department of Food Chemistry and Physics, Institute of Food Research and Product Development, Kasetsart University. Her research interests include food chemistry related to phytochemicals from various sources (e.g., tuber plants, wild plants, and by-products), the rise of bioactive compounds during processing, identification and purification of target phytochemicals, as well as biological activity (e.g., antioxidant activity, antiallergic activity, and anti-obesity).

RESEARCH EXPERTISE

- Utilization of tuber plant in food product
- Characterization of phytochemicals during food processing
- Physiological function of phytochemicals
