## BIBLIOGRAPHY

Miss. Kanyarat is a professional researcher in department of Applied Microbiology at the Institute of Food Research and Product Development, Kasetsart University. Miss Kanyarat's main research interests are in food biotechnology, fermented food and applied probiotics and prebiotics for use in food products. She has previously worked on the related topics of beneficial microorganism for an application in food industry, especially the selection of microorganisms, probiotic properties and an important microbial substance from microbial activity. Also, she will do research on a prebiotic from various agricultural products in Thailand. This knowledge on probiotic and prebiotic will help to develop products containing beneficial microorganisms and good for consumer health.

## RESEARCH EXPERTISE

- Food biotechnology
- Food microbiology
- Probiotic bacteria and prebiotics
