

DR. THIDARAT PANTOA

Professional Researcher

PROFILE

Professional Researcher,
Department of Food
Chemistry and Physics,
Institute of Food Research and
Product Development,
KASETSART UNIVERSITY

BIBLIOGRAPHY

Dr. Thidarat Pantoa is a researcher at the Professional Researcher at the institute of food research and product development, Kasetsart University. Dr. Thidarat Pantoa's main research interests are in food protein especially plant protein and insect protein, in vitro digestion, protein digestibility, and bioactive activity. She has worked with rice proteins, their bioactive activities, rice proteins digestibility, and allergenic potential as her master's and Ph.D. One year since she works as a researcher, she has been working on the effect of food matrix on food component digestibility e proteins, fats, and bioactive compound.

RESEARCH EXPERTISE

- Food proteins
- Plant-based proteins
- Insect proteins
- Food matrix *in vitro* digestion
- Biological activities of food
- Allergenic potential of food
